Continuation of 11. does NOT place the application in condition for allowance because: it would have been obvious to one of ordinary skill in the ad at the time of the invention to provide access to the system of Simpson through the Internet as set forth by Schneider because docketing information is time sensitive information, and the combination allows docketing information to be tracked and appropriate alerts issued remotely. Also, because Simpson provides a methodology including a specific function that can be organized and managed as a module for purposes of efficiency in coding and maintenance. The users in the combined system have access over the Internet.
